POD[®] HANDBOARDS

● AQUA BLUE ● ORANGE ● SILVER ● WHITE/BLUE ● BLACK/BLUE ● LIME

POD aims all times to manufacture enviromentally-friendly rproducts. All our products are designed to look slick, while also being durable and sturdy.

The POD handboard is made of 100% recyclable plastic, and the colour pigment is mineral based, which is enviromentally-friendly.

The board is made of tough polypropylene moulding, which has the benefits of being lightwiegth, whilst retaining strength and bouyancy.

Furthermore the boards are designed to last the distance and can take a fair amount of body bashing.

The POD design is engineered for extreme bodysurfing. Your hand is trapped in the natural swimming position, directly about the board's pivot point and keel fin. The concave-shaped bottom and keel fin will ensure rapid elevation onto the wave and help you hone your wave-holding technique. The result? Less drag in the water, maximum speed, and greater control.

PF1

POD Fins PF1 are performance surfing fins, with precise engineering streamline design and manufactured from high quality natural buoyant rubber compounds. The unique splay rails® combined with symmetric blade provide excellent balance, thrust, speed and control. The drainage design ensures rapid water and sand release from the foot pocket. The pocket itself has been extended for versatile fittings to ensure a comfortable fit.

Available sizes: S (6-7) / SM (7-8) / M (8-9) / ML (9-10) / L (10-11) / XL (11-12)

PF2

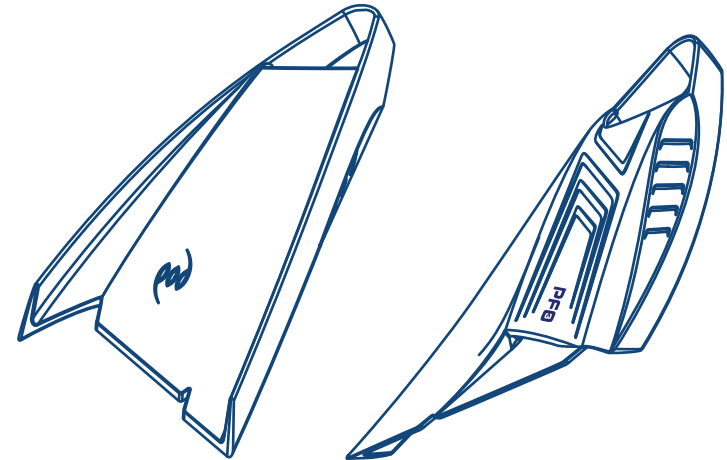

POD Fins PF2 are high performance surfing fins for extreme bodysurfing and bodyboarding. The precise engineering and streamline design, combined with the unique splay rail® and symmetric chisel blade®, provide excellent balance and a more powerful kick, with directed thrust, speed and control. PF2 are made from high quality natural bouyant rubber compounds and exclusively manufactured using the POD patent, a technique that lines the inside of the foot pocket with soft rubber, making it extra comfortable. PF2 are lightweight with deep channels and vertical rails that produce superior wave holding stability. Tread rails® that run along the outside of the foot pocket for extra strength and durability. The drainage design ensures rapid water and sand release from the foot pocket. The pocket itself has been extended for versatile fitting to ensure a comfortable fit.

Available sizes: S (6-7) / SM (7-8) / M (8-9) / ML (9 -10) / L (10-11) / XL (11-12)

PF3

HIGH PERFORMANCE ASYMMETRIC SURFING FINS

PF3 's are high performance asymmetric surfing fins with innovative rail flex, asymmetric V Chisel Blade®, unique Splay Rails®, deep channels, vertical rails and asymmetric foot pocket. These attributes provide a light weight fin with an extremely powerful kick with direct thrust, balance, speed and control with superior wave hold stability.

PF3 's are made from high quality natural buoyant rubber and exclusively manufactured using the POD patent. A lamination technique that layers the outer rail with medium rubber exterior and a hard rubber core increasing rail flex in conjunction with the V Chisel Blade® ensure Give... reducing load on the foot/ankle with equal or more thrust than any asymmetric fin on the market, also the inside of the foot pocket is layered with soft rubber, making it extra comfortable.

To embrace the foot accurately, the foot pocket, top and bottom strap opening is totally asymmetric and the foot pocket is extended for versatile fittings, the drainage design guarantees rapid water and sand release. Available sizes: SM (7-8) / M (8-9) / ML (9-10) / L (10-11)

POD Bicep & Wrist Leash Series has been produced with enviable quality. Uniquely designed with non-protruding fittings provides total freedom of movement in the water.

Green Series Bicep Leash

Features

Medium bicep strap, 1.0 metre leash, 7.2 mm maximum strength urethane, Precision stainless steel set screws, 2 Brass swivels, Double padded neoprene strap, Key pocket.

Available in Black or Clear/Green cord.

Blue Series Bicep Leash

Features

Large bicep strap, 1.0 metre leash, 7.2 mm maximum strength urethane, Precision stainless steel set screws, 2 Brass swivels, Double padded neoprene strap, Key pocket.

Available in Black or Clear/Blue cord.

Yellow Series Bicep Leash

Features

Large bicep strap, 1.2 metre leash, 7.2 mm maximum strength urethane, Precision stainless steel set screws, 2 Stainless steel swivels, Double padded neoprene strap, Key pocket.

Available in Black or Clear/Yellow cord.

Red Series Bicep Leash

Features

X Large bicep strap, 1.2 metre leash, 7.2 mm maximum strength urethane, Precision stainless steel set screws, 2 Stainless steel swivels, Double padded neoprene strap, Key pocket.

Available in Black or Clear/Red cord.

White Series Wrist Leash

Features

1.0 metre leash, 7.2 mm maximum strength urethane, Precision stainless steel set screws, 2 Brass swivels, Thick neoprene strap.

Available in Black or Clear/White cord.

POD Leash Plug

Features

Perfect adjustable plug, spacious bridge to tie cord.

Available in Black, White, Blue, Orange & Lime.

POD Leg Rope Series has been produced with enviable quality. Uniquely designed with precision moulded fittings provides total freedom of movement in the water.

Green Series Leg Ropes

Features

1.8 / 6'0" cord, 7.2 mm maximum strength urethane, Precision moulded fittings, Stainless steel set screws, Stainless steel swivels, Triple wrap rail saver, Double padded neoprene strap.

Available in Black or Clear/Green cord.

Blue Series Leg Ropes

Features

2.1 / 7'0" cord, 7.2 mm maximum strength urethane, Precision moulded fittings, Stainless steel set screws, Stainless steel swivels, Triple wrap rail saver, Double padded neoprene strap.

Available in Black or Clear/Blue cord.

Yellow Series Leg Ropes

Features

2.4 / 8'0" cord, 7.2 mm maximum strength urethane, Precision moulded fittings, Stainless steel set screws, Stainless steel swivels, Triple wrap rail saver, Double padded neoprene strap.

Available in Black or Clear/Yellow cord.
